DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,780,400 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Here claims 1-18 are generic to all that is recited in claims of U.S. Patent No. 6,780,400 B2. That is, claims of U.S. Patent No. 6,780,400 B2 fall entirely within the scope of claims 1-18, or in other words, claims 1-18 are anticipated by claims of U.S. Patent No. 6,780,400 B2. Specifically, the compositions and method of producing antiemetics such as dolasetron, granisetron and metochlopramide recited in instant claims 1-8 are anticipated by the composition for delivery and method of producing them as recited in claims 1-14 of U.S. Patent No. 6,780,400 B2. The rate of particle formation as recited in claims of the instant

Application/Control Number: 10/813,721

Art Unit: 1616

application are disclosed in the specification of U.S. Patent No. 6,780,400 B2 and broadly in claim 8.

Claims 1-18 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 14-24 of copending Application No. 10/814,690. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Here claims 1-18 are generic to all that is recited in claims of copending Application No. 10/814,690. That is, claims of copending Application No. 10/814,690 fall entirely within the scope of claims 1-18, or in other words, claims 1-18 are anticipated by claims of copending Application No. 10/814,690. Specifically, the compositions and method of producing antiemetics such as dolasetron, granisetron and metochlopramide recited in instant claims 1-8 are anticipated by the method of administering an antiemetic and the kit comprising the composition and a device of copending Application No. 10/814,690.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mina Haghighatian whose telephone number is 571-272-0615. The examiner can normally be reached on core office hours.

Application/Control Number: 10/813,721

Art Unit: 1616

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary L. Kunz can be reached on 571-272-0887. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
